- Performing general electrical maintenance.

- Inspecting circuit breakers, and other electrical components.
- Performing circuit breaker corrective maintenance
- Troubleshooting electrical issues using appropriate testing devices.
- Repairing and replacing equipment, electrical wiring, and fixtures.

3) Post : Diploma Technician (Electronics & Communication)

- Assisting Radio & Radar Officers at HAL Airport, Aerodrome Operations Department, ASC Division for technical as well as administrative functions.
- To carry out preventive and breakdown maintenance of facilities under Radio & Radar Section as per maintenance schedules.
 - Air Surveillance Systems.
 - Air Traffic Automation System Servers
 - VHF Communication System – Transmitters & Receivers
 - Telephone and Data network
 - LAN network
- To check the quality of Automation recording Systems as per standard procedure;
- To check the performance of backup systems as per maintenance schedules and keep a record of same.
- Ensure timely updation of system log books and to bring out into notice of Unit-in-charge any unresolved maintenance and other issues
- To check the performance status of all systems daily and keep a record of same.
- Ensure upkeep of the inventory for the Equipment.
- Daily Administrative work related to Radio & Radar section.
- Coordinating with Civil and Electrical department regarding serviceability of Air conditioners, UPS etc. for maintaining critical & sensitive Equipment room and to bring into notice of Section in charge on pending issues.
- Responsibility: Manage Radio & Radar systems independently and provide services without interruption. Report the status to supervisor on an hourly basis.

4) Post : Aircraft Technician (Electrical) / Diploma Technician (Electrical)

- Rectification of electrical wiring related snags.
- Replacement of connectors pertaining to communication and other systems.
- Rectification of single core / multi cores / shield picks up cables electrical snags.

- Replacement of unserviceable / blown-off fuses as per ratings and fuse terminals.
- Provisioning of rubber grommets for the cable bunches near the sharp edges of structure.
- Replacement of damaged data bus couplers (DBC's) and terminal blocks.
- Re-Crimping of damaged contacts of connector with new contacts.
- Rework on relay base / junction modules / earth modules / micro switches and its wiring.
- Replacement of damaged rubber boots, terminal lugs and shrinking of identification sleeves.
- Replacement of unserviceable switches.
- Replacement of RF cables, VOR / ILS / TACAN / CMDS cables, F-Detector cables, eyelets, terminals & lugs, antenna cables, bus cables, cockpit lighting cables, ADF cable etc., by referring to the relevant publication.
- Carryout continuity, insulation and resistance checks on aircraft wiring post rectification.
- Ensure proper securing of cable looms after rework with tie-raps and p-clamps wherever necessary.
- Damaged connectors, end bells, end bell rubbers, back shells replacement and associated system continuity / insulation resistance checks.
- Ensure cleanliness and application of bonding green on all grounding points wherever it is called for in the publication.
- Replacement of damaged lugs by crimping in the Engine Bay Doors and Engine Compartment. Similar rework needs to be carried out in other areas of the aircraft which warrants repair.
- Ensure corrosion prevention and protective treatment on the reworked zones.
- Ensure proper consumables usage and application as per the procedure mentioned in the relevant publication during/post electrical reworks.
- Ensure safety and security after rework. Cleanliness and FOD Checks needs to be ensured.

5) Post : Aircraft Technician (Structure)

- Fitter is responsible for carrying out structural assembly of aircrafts/ helicopters and perform activities like drilling, reaming, riveting of structures, applying sealing compound etc.
- The individual should have basic communication ability and should be responsible in order to maintain procedures.
- He should have the ability of operation monitoring i.e., observing gauges, dials etc.,

- Ability to quickly move hand to grasp and assemble objects (dexterity), reading, writing and communication skills and sensitivity towards safety for self and equipment.

6) Post : Operator (Grinder)

- Identification & Selection of suitable Grinding Wheel, Balance the Wheel.
- Understanding & Reading of the engineering drawing.
- Setting of the instrument (like Micrometer, Passameter, Vernier Caliper, Height Gauge etc.)
- Set up and operate Grinding machine to perform machining operations.
- Truing of the grinding wheel & also able to form the radius and various profile on the grinding wheels.
